Measurements for Life

KompetenzCentrum ebro®

Theory and practice combined are the key to our successful transfer. Our instructors are all experts in their own fields. The aim is to achieve an in-depth understanding of hardware and software alike.

Seminar program 2021

🥏 17.03 18.03.2021 🥏 22.09 23.09.2021	Validation DAC-Universal MK III and MK IV
 08.02 12.02.2021 03.05 08.05.2021 06.12 11.12.2021 	Validation training VALI B corresponding to the framework curriculum of the DGSV Extensions/Alterations to the course modules will be taken into account at the next possible date Seminar location: Ingolstadt, Germany
9 30.03.2021	Advanced course measurement technology for food control
🥏 23.06 24.06.2021	System validation in the hospital and in the resident field (Basic course)
	Validation Basic Training for Distributors and their costumers

You can find the current program on our homepage **www.ebro.com/en/training**

Information: Further dates on request. Requirement: 6 participants at least

New Data Logger from the EBI 12 series

EBI 12-T222

The logger reacts very quickly on temperature changes caused by the small and fast probe. It is therefore ideally suited for temperature measurement during process validation.

Technical details on page 15

EBI 12-T237

The data logger can be used in several measurement applications in the food and pharmaceutical industries. For example in stability chambers, retort sterilization and in pasteurization tunnels.

Technical details on page 12

EBI 12-TP237

This data logger is used for simple pressure checks in pipelines as well as in the washer-disinfectors or even steam sterilizers.

Technical details on page 22

EBI 12-T26x

The new bottle loggers with a temperature probe are characterized by their robustness and easy handling. With the M10 thread, they can easily be attached to the bottle adapter and the probe can be brought into the optimal position for measurement.

Technical details on page 14

Data Loggers

ebro[®] offers data loggers for many different applications:

Operation and Process qualification

Description:

- Highly accurate temperature, pressure, humidity
 and conductivity data loggers for thermal validation processes
- Wide range of probe types and configurations
- Wireless data loggers for real time monitoring
- Data loggers for low space

Routine control / Mapping

Description:

- Highly accurate temperature, pressure, humidity and conductivity data loggers for thermal process control
- Electronic Bowie&Dick-Test according to ISO 17665 and EN 285 / EN 13060
- Data loggers for low space
- Data loggers for regular process controls

Applications:

- Process validation in steam sterilizers, autoclaves, in the production of canning, a.s.o.
- Process validation in washer-disinfectors and washer-disinfectors for endoscopes
- F₀-value and A₀-value calculation
- Process validation in low temperature sterilizers such as EtO, LTSF and H₂O₂

Applications:

- Routine control in steam sterilizers and autoclaves
- Routine control in washer-disinfectors and washer-disinfectors for endoscopes
- Routine control at canning
- Mapping

www.ebro.com

Room Monitoring and Process control

Description:

- Highly accurate temperature, pressure and humidity data loggers
- Standard temperature and humidity data loggers with automatic PDF report generation
- Wireless system to monitor temperature and humidity
- Multichannel Thermo Couple temperature data loggers

Applications:

- Room monitoring
- Transport and storage monitoring
- Clean room and freezer monitoring

Logger systems

and accessories for Process monitoring, Routine control and Validation

Pharmaceutical

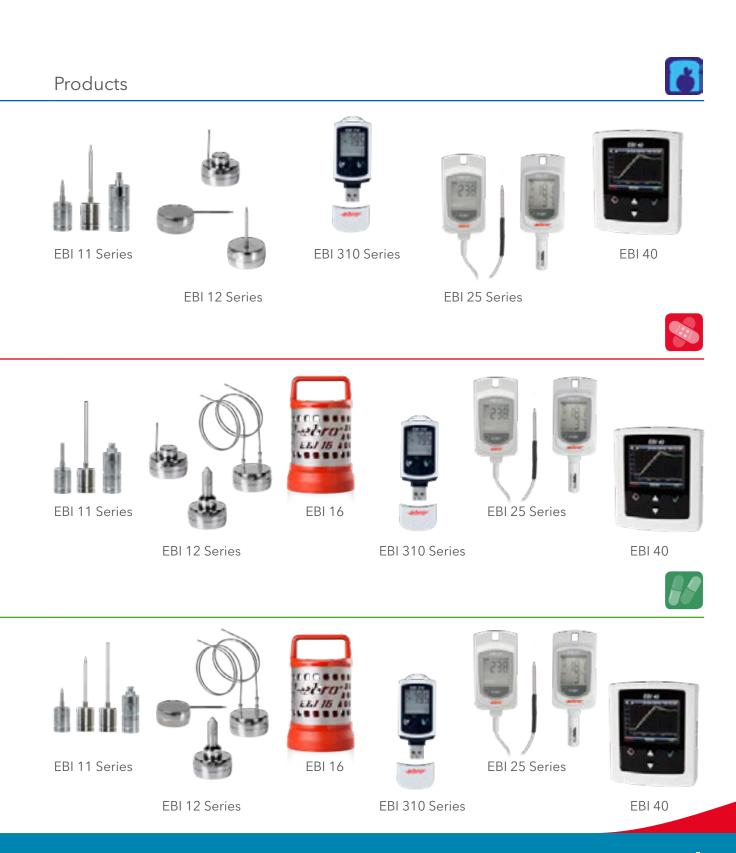

Applications

- Autoclaves / Sterilizers / Pasteurization Processes
- Continuous Fryers
- Lyophilization
- Hydrostatic Retorts
- Refrigerators / Freezers / Cooling Rooms
- Smokehouse
- Cooker / Cooler (Reel and Spiral)
- Steam Sterilization
- Washer disinfectors / bedpan washers
- H₂O₂-, LTSF- and EtO- Sterilization
- Depyrogenation / heat tunnel
- Incubators
- Refrigerators / Freezers / Cooling Rooms
- Stability Chambers
- Steam-,H₂O₂ and EtO- Sterilization
- Washer disinfectors
- Depyrogenation / heat tunnel
- Lyophilization
- Incubators
- Refrigerators / Freezers / Cooling Rooms
- Climatic Test Chambers / Stability Chambers

Process monitoring, Routine Control and Validation easy and safe

Validation

Is a reproducible proof that a process permanently generates the required results. Validation is a clear demonstration that processes, equipment, materials, work steps or systems actually lead to the expected results.

Routine Control

Routine control is a regular test to determine the performance of the equipment. It is the verification that the limits are in accordance to the validation.

The frequency depends on the device and the process.

Continuous Process Monitoring

The continuous process check as a validated status during the commercial manufacturing process ensures that the ongoing process remains under continuous control. The recognition of unplanned deviations from the plan is indispensable to the achievement of the set objectives and the conformity with the requirements.

EX Area

Hazardous areas (except for mining)

The categories 1 to 3 are classified according to the ATEX Directive 94/9 / EC. The letter "G" stands for gas. In the IEC 60079-0 for electrical components and devices, and thus for approvals according to the IECEx scheme, Equipment Protection Levels (EPL) are defined.

Devices according to Category 1G or EPL Ga

Devices must be designed in such a way as to ensure a very high degree of safety. Devices of this category must also ensure the required degree of safety even in the case of infrequent disturbances. Even if there are two faults on the unit, ignition must not occur. They may be used in Zone 0 (Category 1G).

Requirement for reprocessing of medical devices

Reprocessing of medical devices coming to an intended application as low-germ or sterile is to perform. By using the manufacturer's instructions with suitable validated process and procedures, that the success of this procedure is reproducible and do not endanger the safety and health of patients, user and third parties.

Data Logger Systems

ebro[®] is specialist for measuring systems for flexible and reliable measurement and documentation systems for routine control and validation of various thermal processes in the medical field, the pharmaceutical and the food industry.

Our product range covers easy to use data loggers of the EBI 12 and EBI 11 series, which are placed directly in the process. An intuitive, TÜV certified software to routine testing or validation of processes assists to evaluate your process data.

In addition, we offer you the certified EBI 16 system to perform the daily Bowie&Dick-test with a clear "fail" or "passed" result.

TÜV certified evaluation software Winlog.med and Winlog.validation

With the Winlog.med / Winlog.validation we offer a TÜV certified, FDA 21 CRF Part 11 compliant software. The system is characterized by high data security. The automatic evaluation of the process is possible as well as the manual evaluation.

The software offers the possibility to create user defined evaluations. So it is possible to create individual process parameters and test criteria.

Conformance

Our systems are compliant with the relevant standards and guidelines.

DIN EN ISO 17665	Sterilization of health care products Moist heat - Requirements for the development, validation and routine control of a sterilization process for medical devices	
DIN EN 285	Sterilization – Steam sterilizers – Large sterilizer	
DIN EN ISO 15883	Washer disinfectors - General requirements, terms and definitions and tests	
DIN EN 13060	Small steam sterilizers	
DIN SPEC 58929	Operation of small steam sterilizers in health care - Guidelines for validation and routine monitoring of sterilization processes	
DIN EN ISO 11135	Sterilization of health care products - Ethylene oxide - Requirements for the development, validation and routine control of a sterilization process for medical devices.	
DIN EN ISO 25424	Sterilization of medical devices - Low temperature steam and formaldehyde - Requirements for development, validation and routine control of a sterilization process for medical devices.	
DIN EN ISO 11140-4	Sterilization of health care products - Chemical indicators - Class 2 indicators as an alternative to the Bowie&Dick-type test for detection of steam penetration.	
DIN EN ISO 9241	Ergonomics of human-system interaction: Dialogue principles	
DIN 12880	Electrical laboratory equipment - heaters and incubators	
DIN EN ISO 13408-3	Aseptic processing of healthcare products Part 3: Lyophilization	
DIN EN ISO 14937	Sterilization of healthcare products General requirements for characterization of a sterilizing agent and the development, validation and routine control of a sterilization process for medical devices.	
ISO/IEC 25051	Software engineering Systems and software Quality Requirements and Evaluation (SQuaRE) Requirements for quality of Ready to Use Software Product (RUSP) and instructions for testing	
FDA 21 CFR Part 11	Is the part of the FDA regulations about electronic records and electronic signatures, specifies the criteria under which electronic records and electronic signatures can be considered trustworthy and reliable as a paper document	
FDA 21 CFR Part 210-211	Defines minimum requirements for the methods to be dispatched in the manufacture, processing, packaging and warehousing of drugs and vaccine and distribution and controls to be used.	
Guidelines	Guidelines from DGKH, DGSV and AKI for the validation and routine monitoring of machine cleaning and thermal disinfection processes for medical devices	
Recommendations	DGKH recommendations for validation and routine monitoring of sterilization processes with moist heat for medical devices	

Temperature data loggers of EBI 12 series

General technical specifications for EBI 12 T series

Operating temperature: logger	-90 °C +150 °C (-130 °F +302 °F)*	
Operating temperature: radio operation	-30 °C +150 °C (-22 °F +302 °F)	
Temperature accuracy	±1.5 °C (-200 °C90 °C)*	
	±0.5 °C (-90 °C40 °C)*	
	±0.2 °C (-40 °C 0 °C)*	
	±0.1 °C (0 °C +120 °C)*	
	±0.05 °C (+120 °C +140 °C)*	
	± 0.1 °C (+140 °C +150 °C)*	
	± 0.5 °C (+150 °C +250 °C)* ± 0.8 °C (+250 °C +400 °C)*	
Time accuracy	< 5 sec (24 h)	
Temperature resolution	0.01 °C	
Sensor	Pt 1000, Class A	
Interval	250 ms 24 hours.*	
Measurement mode	Endless measurement	
	Start / stop measurement	
	Measure upon start temperature	
	Start immediately until end of memory	
Storage temperature	-20 °C +70 °C (-4 °F +158 °F)	
Maximum operating pressure	Temperature logger 10 bar (abs), 4 bar (abs) with flexible cable probes	
Minimum operating pressure	Logger with flexible cable probe 20 mbar (abs)	
Battery	Lithium cell, 3.6 V, user replaceable	
Dimensions (Ø x H)	48 mm x 24 mm**	
Weight	Approximately 110 g **	
Housing material	316 L Stainless steel / PEEK	
Protection class	IP68	
Certificate	Factory calibration certificate	

** Dimensions and weight may be differerent depending on the type.

Product lines

Data loggers with this symbol have flexible or bendable temperature sensors or, in addition to temperature, can also log other measurands such as pressure, humidity, conductivity. The measured values can be transmitted via radio mode. Field of applications for the data logger of the EBI 12 series are: medicine, pharmaceuticals, food & beverages, as well as industry. Temperature data loggers with this symbol have usually rigid temperature probes. They are characterized by their easy handling and robustness. Data loggers in this line of products have good accuracy and data memory. Most data loggers have a mounting thread for easy fixation.

The data logger can be used in several measurement applications in the food and pharmaceutical industries. For example in stability chambers, retort sterilization and in paste station tunnels.

a xylem brand Peringer

EBI 12-T100 Temperature Data Logger with internal temperature sensor

Application samples

- For process monitoring during convenience food production
- For routine control in bedpan washers
- For temperature mappings
- To measure in raw material storage

Temperature / Pressure Data Loggers EBI 12 series

General technical specifications: valid for all EBI 12-TP data loggers

Operating temperature: pressure logger	0 °C +150 °C (+32 °F +302 °F)
Accuracy: temperature	±0.1 °C (0 °C +120 °C)
	±0.05 °C (+120 °C +140 °C)
	±0.1 °C (+140 °C +150 °C)
Accuracy: pressure	±15 mbar (1 mbar 50 mbar)
	±10 mbar (50 mbar 150 mbar)
	±10 mbar (2,050 mbar 2,250 mbar) ±10 mbar (3,000 mbar 3,250 mbar)
	±15 mbar (3,250 mbar 3,250 mbar)
	± 0.5 % FS (3,500 mbar 4,000 mbar)
Resolution: temperature	0.01 °C
Resolution: pressure	1 mbar
Data memory	Max. 100,320 total measurement values
Sensor: temperature	Pt 1000, Class A
Sensor: pressure	Piezoresistive pressure sensor (temperature compensated)
Sampling rate	250 ms 24 h
Measurement mode	Endless measurement
	Measure upon start time
	Start immediately until end of memory
<u></u>	Start / Stop measurement
Storage temperature	-20 °C +70 °C (-4 °F +158 °F)
Maximum operating pressure	Pressure logger: 7 bar (abs), 4 bar (abs) with flexible cable probes
Minimum operating pressure	Logger with flexible cable probe: 20 mbar (abs)
Time accuracy (24h)	< 5 sec
Battery	Lithium cell, 3.6 V, user replaceable
Dimensions (Ø x H)	48 mm x 32 mm*
Weight	Approximately 120 g *
Housing material	316 L Stainless steel / PEEK
Protection class	IP68
Certificate	Factory calibration certificate
* Dimensions and weight may be differerent	depending on the type.

EBI 12-TPX9X Precision Pressure Logger high precision pressure measurement down to 0.1 mbar

A very precise pressure measurement is required in the process of the H₂O₂ sterilizer. The data logger measures from an absolute pressure of 0.1 mbar. Due to the very low working pressure, close to the vacuum, is a special measuring system required.

Measurement range: temperature	0 °C +85 °C (+32 °F +185 °F)
Measurement range: pressure	0.1 1,050 mbar (0.1 788 Torr)
Accuracy: temperature	±0.1 °C

Electronic Bowie&Dick-Test for measuring steam penetration in the steam sterilizer

EBI 16 Alternative Bowie&Dick-Test accordance to DIN EN 285 / ISO 17665 / ISO 11140-4

The EBI 16 forms together with the evaluation software Winlog.med an easy to use and reliable electronic measurement system.

This allows implementing a comprehensive routine control of steam sterilizers by means of the alternative Bowie&Dick-Test according to EN 285 / DIN EN ISO 17665. In addition to checking the penetration of steam, the relevant sterilization parameters are also checked.

A vacuum test can also be carried out with this device.

The EBI 16 is designed to ensure the use of 1,000 cycles or 3 years without calibration or service.

AL 285 Logger-Check For thermal measuring system control in steam sterilizer

In combination with the software Winlog.validation the AL 285 offers you a simple functional check of the measuring channels.

EN ISO 17665-1, paragraph 9.1.4

Verification of the calibration value of the measuring instrument that is used for the validation of the sterilization process at process condition.

- Easy and reproducible test with automatic generation of reports.
- The tests are stored permanently in the database

Set SI 1100 for EBI 12 and EBI 11

- 2-port Interface IF 100 •
- Software Winlog.pro
- USB connection
- Colored LEDs signaling programming, • readout and incorrect development

Set SI 1200

for EBI 12

- 4-port Interface IF 200
- Software Winlog.pro
- USB connection
- Colored LEDs signaling programming, readout and incorrect development
- Includes antenna

Set SI 2100

- for EBI 12 and EBI 11
- 2-port Interface IF 100
- Software Winlog.med
- USB connection
- Colored LEDs signaling programming, readout and incorrect development

Set SI 2110

- for EBI 12
- 4-port Interface IF 200 Software Winlog.med
- USB connection
- Colored LEDs signaling programming, readout and incorrect development
- Includes antenna

Set SI 2150 for EBI 12 and EBI 16

- •
- 1-port Interface IF 150 Software Winlog.med
- •
- USB connection
- Colored LEDs signaling programming, readout and incorrect development

Set SI 3200 for EBI 12

- 4-port Interface IF 200
 Software Winlog.validation
 - USB connection
- Colored LEDs signaling programming, readout and incorrect development
- Includes antenna

- AL 112 for IF100 and IF 200
- Developed for real time monitoring
- AL 112 is a cable with 3 m lenght
- Antenna placement in the field of the •
- door seal of a sterilizer or washerdisinfector
- Antenna steam-tight
- It is possible by a sealing to introduce it in the chamber

Can adapter set EBI DA-Set

With this adapter set you can fix the data loggers at cans or plastic bags. Designed for data loggers of the EBI 12 series with axial, radial or external probes. Hereby you assure the use to ensure proper probes placement.

Bottle adapter EBI FL-S

silicone

for bottle loggers

(see page 14)

Can adapter EBI DA for bottle loggers (see page 14)

Dummy bottle

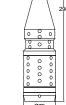

Dummy 0,5 l

Dummy E

Dummy 1 l

a **xylem** brand

Dummy 0,7 l

Grommets for sensor fixing **EBI NI-140** Allows precise fixation of the logger sensor, with a 3 mm diameter, in cans and glasses.

Compression fitting EBI KV-3 Allows exact positioning of the logger sensor, with a diameter of 3 mm, in glasses (lid).

Please find EBI 12-T23X Temperature data logger from page 12.

The dummy bottles can be screwed to the ground. This allows the EBI 12 to be positioned within the bottle.

Mini Temperature Data Loggers EBI 11 Series

General technical specifications: valid for all EBI 11-T logger types

Operating temperature	-30 °C +150 °C (-22 °F +302 °F)
Accuracy	±0.2 °C (-30 °C +0 °C) ±0.1 °C (0 °C +150 °C)
Time accuracy (24h)	< 5 sec
Resolution: temperature	0.01 °C
Data memory	15,000 measurements (total)
Sensor	Pt 1000, Class A
Sampling rate	1 sec 24 h
Measurement mode	 Endless measurement Start / Stop measurement Measure upon start time Start immediately until end of memory
Storage temperature	-20 °C +70 °C (-4 °F +158 °F)
Max. operating pressure	20 bar (abs.)
Battery	Lithium button cell, 2 x BR1225 A, 3V, replaceable
Dimensions (Ø x H)	16,5 mm x 24 mm*
Weight	Approximately 45 g *
Housing material	Stainless Steel (V4A)
Protection class	IP68
Certificate	Factory calibration certificate
* Dimensions and weight may be diff	ererent depending on the type.

Product lines

Data loggers with this symbol are characterized by their very small size. For this reason, they are used in the smallest of spaces, for example to control pasteurization in bottles or to carry out thermal tests in small sterilizers.

Data loggers with this symbol are characterized by their very small size. That is why they are very popular with food manufacturers for testing the effects of temperature during pasteurization.

EBI 11-T210 Mini Temperature Data Logger *rigid metal probe*

Technical Data

Measurement range: temperature	-30 °C +140 °C (-22 °F +284 °F)		
Data memory	15.000 measurement values		
Factory calibration certificate	0 °C, +60 °C and +134 °C		

Expected to be available from Q2 2021.

 1 external temperature probe, axial, pointed,
 Ø 3 mm

•	Probe with M5 external thread	Туре	Description	Part No.
		EBI 11-T210	Needle Length = 20 mm	1340-6260

Validation, Routine and Process control sets

Due to the different requirements for the process control, the routine control and validation of processes, there are different sets at ebro[®].

As an example, applications for the different sets are clearly displayed in the table. So, it is possible to choose the set suitable for your application at a glance.

	SL 1011	SL 1111	SL 1521	SL 1621	SL 2002	SL 3001	SL 3101	SL 3111	SL 3302	SL 4002	SL 4021	SL 4102	SL 4121

Data Logger

Complete Data Logger Sets for Process control and Monitoring, for Routine Control, Mapping and Acceptable Quality Limit (AQL)

Description:

- Data Loggers with evaluation software and extensive equipment
- FDA 21 CFR Part 11 conform software

Applications:

- Process control, Monitoring and routine control in steam sterilizers, washer disinfectors, washer disinfectors for endoscopes as well as bedpan washers.
- Implementation of the electronic Bowie&Dick-Test.
- Process and routine control of pasteurization and bottle cleaning processes
- Process and routine control in cooking processes
- Process and routine control in other thermal processes in the food, pharma or medical sector

Advantages:

- Fully automatic and tamper-proof evaluation
- Individual evaluation by user-defined evaluations
- Wide range of wireless data loggers for different applications
- Highly flexible temperature cable probe
- High precision Pt 1000 temperature sensors
- High accuracy up to ±0.05 °C
- TÜV certified, FDA 21 CFR Part 11 conform software
- 2 years warranty

Complete Data Logger Sets for Operation and Process Qualification

Description:

- Data Loggers for validation with evaluation software and extensive equipment
- TÜV certified
- FDA 21 CFR Part 11 conform software

Applications:

- Operation and Process Qualification in pasteurization and bottle cleaning processes.
- Operation and Process Qualification in steam sterilizers, washer disinfectors, washer disinfectors for endoscopes as well as DAC-Universal
- Operation and Process Qualification in cooking processes
- Operation and Process Qualification in other thermal processes in the food, pharma or medical sector

Advantages:

- Fully automatic and tamper-proof evaluation
- Individual evaluation by user-defined evaluations
- Wide range of wireless data loggers for different applications
- Highly flexible temperature cable probe
- High precision Pt 1000 temperature sensors
- High accuracy up to ±0.05 °C
- TÜV certified, FDA 21 CFR Part 11 conform software
- 2 years warranty

Data Logger Sets for process and charge control, for routine control, mapping and Acceptable Quality Limit (AQL)

- **EBI 11 Mini Data Logger Sets** SL 400X: for temperature monitoring in cans (*see page 47*) SL 4102: for temperature monitoring in bottles (*see page 48*)
- **EBI 16 Bowie&Dick-Test Sets** according to EN 285 / ISO 17665 SL 1521: for steam sterilizers (*see page 46*) SL 1621: for steam sterilizers and washer disinfectors (*see page 46*)
- EBI 12 Precision Data Logger Sets

For process and routine control of food and pharma processes as well as medical processes according to the German guideline. SL 1011: for bedpan washers (see page 44) SL 1111: for steam sterilizers and washer disinfectors (see page 45) SL 402X: for temperature monitoring in tins (see page 48) SL 412X: for temperature monitoring in bottles and cans (see page 49)

SL 4211: for temperature monitoring in different applications (see page 49)

The sets can individually be expanded or compiled yourself from one or more data loggers (EBI 11, EBI 16 or EBI 12), the appropriate interface and the corresponding software. Talk to us!

SL 1011 Temperature Data Logger Set for temperature monitoring and A₀ value calculation in bedpan washers

Type Description Part No. SL 1011 EBI 12 data logger set for bedpan washers 1250-1011

The set contains:

- 1 x EBI 12-T101 Temperature data logger (see page 11)
- Winlog.med Software
- EBI IF 150 Interface
- Carrying case "SYSTAINER"
- pH & conductivity tester (see page 59)

Data Logger Sets for Operation and Process Qualification

- EBI 11 Mini Data Logger Sets SL 3302: Validation set for DAC Universal MK IV (see page 53)
- **EBI 12 Precision Data Logger Sets** SL 2002: for washer disinfector (see page 50) SL 3001: for benchtop sterilizers (see page 51) SL 3101: for large steam sterilizers (see page 51)

The sets can individually be expanded or compiled by yourself from one or more data loggers (EBI 11, EBI 16 or EBI 12), the appropriate interface and the corresponding software. Talk to us!

SL 2002 Complete Validation Set for washer disinfectors

For the validation of washer disinfector processes according to ISO 15883. The set can individually be expanded or compiled yourself from one or more data loggers (EBI 12 or EBI 11), the appropriate interface and corresponding TÜV certified software. Talk to us!

- 1 x EBI 12-T220 Temperature data logger
- 2 x EBI 12-T441 Temperature data loggers
- 1 x EBI 12-TP231 Temperature/ pressure data logger
- 1 x EBI 12-TC230 Temperature/ conductivity data logger
- EBI IF 200, 4-port Interface with USB connection and antenna
- Software Winlog.validation
- Carrying case "SYSTAINER"

SL 3001 Complete Validation Set for benchtop steam sterilizers

For the validation of processes with small steam sterilizers according to ISO 17665.

The set can individually be expanded or compiled yourself from one or more data loggers (EBI 11, EBI 16 or EBI 12), the appropriate interface and corresponding TÜV certified software. Talk to us!

The set contains:

- 1 x EBI 12-TP453 Temperature / pressure data logger with AL 101 silicone protection box
- EBI IF 200 4-port Interface with USB connection and antenna
- Software Winlog.validation
- Carrying case "SYSTAINER"

Description SL 3001 Validation set for small steam sterilizers 1250-3001

Part No.

SL 3101 Complete Validation Set with flexible wired probes for large steam sterilizers

Туре

For the validation of steam sterilizer processes according to ISO 17665.

The set can individually be expanded or compiled yourself from one or more data loggers (EBI 11 or EBI 12), the appropriate interface and corresponding TÜV certified software. Talk to us!

The set contains:

- 5 x EBI 12-T471 Temperature data loggers with AL 107 silicone protection boxes
- 1 x EBI 12-TP453 Temperature/ pressure data logger with AL 101 silicone protection box
- EBI IF 200, 4-port Interface with USB connection and antenna
- Software Winlog. validation
- 2 x AL 190 silicone cable strap sets
- Туре Carrying case "SYSTAINER"

Equipment for operation or process gualification

AL 3305 DAC Adapter Set for validation of the thermal process in DAC UNIVERSAL MK IV

Туре

With the Adapter set is an independent process qualification of a DAC Universal MK III and MK IV in combination with ebro EBI 11 data loggers possible. No modification on the customers lid necessary.

Xylem Analytics Germany Sales GmbH & Co. KG, ebro Peringerstr. 10.85055 Ingolstadt, Germany Phone + 49 84195478-0. Fax + 49 84195478-80. Email: ebro@xyleminc.com www.ebro.com

SL 3302 Complete Validation Set for DAC UNIVERSAL, small steam sterilizers as well as washer disinfectors

Very flexible data logger system to perform validations for DAC Universal MK IV according to ISO 15883. This reliable system consists of user-friendly mini data loggers that can be placed directly in the processes and an evaluation software package that has been certified by the TÜV.

The set contains:

- 2 x EBI 11-T235 Mini . temperature data logger, needle length: 25 mm
- 2 x EBI 11-T236 Mini temperature data logger, needle length: 80mm
- 1 x EBI 11-P111 Mini pressure data logger
- EBI IF 300, 4-port Interface ۰
- Winlog.validation Software •
- Carrying case "SYSTAINER"

Other additional Accessories

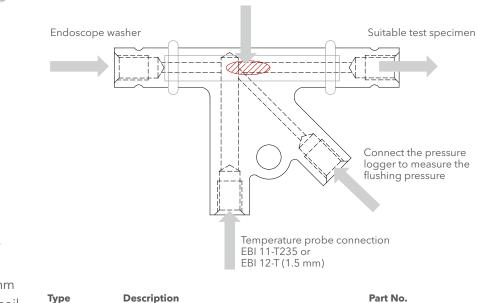

AL 126 Test adapter for hollow bodies and hoses for validation in washer disinfector and endoscope washer

The test adapter offers a simple solution in connection with cleaning indicator (test soil) to perform a routine test in relation to cleaning performance as well as performance qualification during validation processes according to national standards.

In addition to AL 126 we recommend also to use a combination of pressure and temperature logger.

Test soil

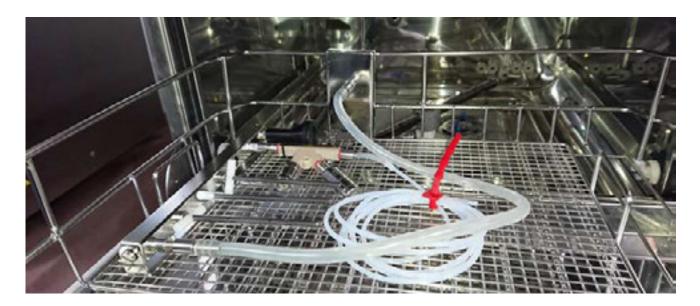

The set contains:

- Test adapter
- Luer-Lock connection to connect a pressure logger
- 2 x Tube adapter 4 mm
- 1 x clamp connection 1.5 mm
- 2 x O-rings for fitting test soil AL 126

Process Monitoring

Description:

- Radio data logger system for temperature and humidity measurements
- Other measurements can be integrated using Modbus over IP or other protocols
- Automatic alarm when limit is exceeded
- Automatic report generation

EBI 40 Multi-Channel Temperature Data Logger

Description:

Applications:

- Temperature data logger for up to 6 or 12 thermocouple sensors with SMP connection
- Current measurement values and measurement curve shown on multi-color TFT display
- With USB connection for fast programming and readout of the measurement data

Applications:

- Continuous monitoring of Food in cooling or freezing areas, Drugs and vaccine in Drug Stores, clinical trials in labs and in Warehouses
- Monitoring of food in cooling or freezing areas, drugs and vaccine in drug stores, clinical trials in labs and in warehouses

www.ebro.com

EBI 310 PDF Data Logger

Description:

- Multi-use data loggers for temperature and humidity measurement
- USB connection
- Automatic PDF report generation with all measurement data
- Easy programming of the data loggers via the free online configurator at **www.ebi310.com**, no special software required

Applications:

• Monitoring of food in cooling or freezing areas, drugs and vaccine in drug stores, clinical trials in labs and in warehouses

EBI 40 Multi-Channel Temperature Data Logger

The EBI 40 Multi-Channel Temperature Data Logger records temperatures during process monitoring and validation. Current measurement values and the measurement curve can be read on the multi-colored TFT display. The thermal insulation using the thermo isolation box allows the use of the data logger at very high temperatures. The EBI 40 is suitable for the connection of up to six or twelve thermocouple probes.

Applications:

- Incubators
- Monitoring and validation of processes in:
- Refrigerators
- Climate cabinets
- Storage rooms
- Transport studies
- Freeze-dryers etc.

EBI 25 Wireless Data Logger System

The EBI 25 system for wireless monitoring of temperature, humidity and other measurements assures that perishable goods are produced and stored at the right conditions at all times. Other measurements can be integrated using Modbus over IP.

Benefits:

- Continuous monitoring
- Avoid loss of goods
- Quick intervention before it is too late
- Automatic documentation
- Worldwide access to the measurement data
- Easy handling, user replaceable battery

Xylem Analytics Germany Sales GmbH & Co. KG, ebro Peringerstr.10·85055Ingolstadt,Germany·Phone+49 84195478-0·Fax+49 84195478-80·Email:ebro@xyleminc.com·**www.ebro.com**

Embedding of other measurements possible:

- Differential pressure
- CO₂
- Particles
- Power demand
- Many others

EBI 25 data loggers

- Precise measurement of temperature and humidity (depends on logger type)
- Very large range of up to 500 m in a free field
- Max. Range of 100 m in buildings (depending on the building fabric)
- Long battery lifetime
- Easy installation

Base station: IF 400 interface

- Collects and stores the data of all connected EBI 25 data loggers
- Connection of up to 50 loggers per interface possible
- Stores up to 576 measurements per logger
- Direct connection of any number of interfaces to a PC or the network
- Audible alarm (with optional alarm box)

Evaluation software: Winlog.web and Winlog.wave

Winlog.wave: Basic version for local PC usage.

Winlog.web: Professional version for internet and local network based use.

Please find more information from page 84.

General technical specifications: valid for all EBI 25 data logger types*

Resolution: temperature	0.1 °C (0.2 °F) in a range of -99.9 °C +199.9 °C (-147.8 °F +391.8 °F) 1 °C (2 °F) of the remaining measurement range
Resolution: humidity (humidity data loggers only)	0.1 % rH
Memory	288 measurement values (per channel)
Sampling rate	1 min. to 24 hours, adjustable
Radio frequency	868 MHz in EU
Battery 3.6 V lithium (user replaceable)	
Battery lifetime Up to 2 years, depending on measurement and transmission rate	
Storage temperature	-40 °C +85 °C (-40 °F +185 °F)
Operating temperature	-30 °C +60 °C (-22 °F +140 °F)
Measurement mode	Endless measurement
Housing material	ABS
Weight	Approximately 65 g

* Please find the exact technical data of each EBI 25 data logger type on the next pages.

EBI 25-T Wireless Temperature Data Logger with internal temperature sensor

Technical Data

Measurement range	-30 °C +60 °C (-22 °F +140 °F)	
Accuracy	±0.5 °C at -20 °C +40 °C (±0.9 °F at -4 °F 104 °F) ±0.8 °C (±1.4 °F) for the remaining measurement range	
Sensor	NTC	
Protection class	IP67	
Dimensions (L x W x H)	95 x 48 x 27 mm	
Factory Calibration Certificate	-20 °C and 0 °C	

Type Description		Part No.	
	Wireless temperature logger (with internal sensor)		

EBI 25-TE Wireless Temperature Data Logger with external probe

Measurement range	-40 °C +85 °C (-40 °F +185 °F)
Accuracy	±0.5 °C -20 °C +40 °C (±0.9 °F at 4 °F 104 °F) ±0.8 °C -30 °C20 °C / +40 °C +60 °C (±1.4 °F at -22 °F4 °F / +104 °F +140 °F) ±1.5 °C -40 °C30 °C / +60 °C +85 °C (±2.7 °F at -40 °F22 °F / +140 °F+185 °F)
Sensor	NTC
Probe	Ø 3.8 mm, L = 65 mm, with 2 m PUR cable
Protection class	IP67
Dimensions (L x W x H)	95 x 48 x 27 mm (without probe)
Factory Calibration Certificate	-20 °C and 0 °C

Description Туре EBI 25-TE Wireless temperature logger (with external probe) 1340-6201A

Part No.

EBI 25-TH Wireless Temperature / Humidity Data Logger *with external humidity sensor*

At www.ebro.com you will find matching filter caps for sensor protection.

Technical Data

Measurement range: temperature	-30 °C +60 °C (-22 °F +140 °F)	
Measurement range: humidity	0 % rH 100 % rH	
Accuracy: temperature	±0.5 °C -20 °C +40 °C (± 0.9 °F at -4 °F 104 °F) ±0.8 °C (±1.4 °F) for the remaining measurement range	
Accuracy: humidity	±3 % rH (10 % 90 %)	
Sensor	NTC for temperature / capacity humidity sensor	
Protection class	IP20	
Dimensions (L x W x H)	124 x 48 x 27 mm (with probe)	
Factory Calibration Certificate	0 °C and +20 °C	

Туре	Description	Part No.
EBI 25-TH	Wireless temperature / humidity logger	1340-6202A
AH 100	PTFE filter for EBI 25-TH	1340-5627
AH 300	Stainless steel sintered filter for EBI 25-TH	1340-5625

Sets and Accessories for EBI 25

AL 250 - Protection Box for EBI 25 TE and TX

Protects the data logger from hose water, as it is the case when cleaning production sites.

Delivery Contents: Incl. Mounting material, drill template, holder for EBI 25 logger.

Technical Data

Protection Class IP67 Dimensions 170 x 80 x 68 mm (L x W x H)

EBI 2 AB-2 - Alarmbox to connect to interface IF 400

If you prefer to be informed about a violation of the limit, close the alarm box to the IF 400 base station. Depending on the setting in the software, you will receive an alarm via this base station or the loggers.

The alarm box has a potential-free changeover contact which is used to connect additional devices for alarming.

Delivery Contents: Incl. Mounting material

AL 251 - orange Flash Light and buzzer combination

You can connect the LED / buzzer combination to the potential-free contact of the alarm box for visual alarm in case of limit violations.

Delivery Contents: Power supply and connection cable are not included.

Technical Data

Supply Voltage	100 to 250 V AC
max. switched power	8A, 30V DC / 250V AC
Dimensions (L x W x H)	120 x 80 x 55 mm

Technical Data

Supply Voltage	24 V DC
loudness	92 dB
Protection Class IP65	
Dimensions (L x W x H)	120,5 x 91 x 91 mm

EBI IF 400 - Interface for EBI 25 data logger

The interface works as a communication interface between EBI 25 data logger and software Winlog.wave or Winlog.web

Delivery Contents: Antenna, Power Supply, USB-cable.

Technical Data

Protection Class	tection Class IP20	
Dimensions (without Antenna) (L x W x H)	150 x 180 x 45 mm	
Operating Temperature	-25 °C+50 °C	
USB- Connection	Typ B 100 mA USB 1.1	
LAN- Connection	Ethernet 10 / 100	

Technical Data

Material	ABS
Dimensions (L x W x H)	150 x 180 x 45 mm

AG 152 - Wall Mount for EBI 25 data logger

The AG 152 is used for simple and secure attachment of the EBI 25 data loggers.

Delivery Contents:

Logger fastening, Opening tool, Mounting material (double sided tape, screws, dowel, cable ties).

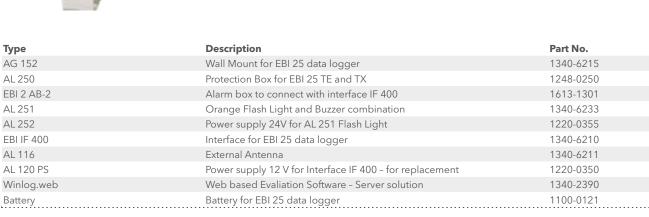

AL 116 - external Antenna to connect with IF 400

Install the antenna in the wet area and increase the range.

Delivery Contents: Mounting material (screws / dowel).

Technical Data	
Cable length	3 m

Cable length	3 m
Dimensions (L x W)	110 x 255 mm

EBI 310 PDF Data Loggers

Cold Chain Monitoring

The easy to use data loggers with USB connection monitor the temperature and/or humidity during transport and storage of sensitive goods like medicine, food, serums etc. Measurement reports are created automatically as PDF files when you connect the logger to a PC.

The EBI 310 PDF data loggers are well suited for mappings e.g. of warehouses to identify critical temperature spots.

Xylem Analytics Germany Sales GmbH & Co. KG, ebro Peringerstr.10·850551ngolstadt,Germany·Phone+49 84195478-0·Fax+49 84195478-80·Email:ebro@xyleminc.com·**www.ebro.com**

Program | Measure

- Programming of the logger with the help of the free online configurator at **www.ebi310.com** or optionally via the ebro software Winlog.basic or Winlog.pro
- Set optional limits and start to record the measurement data

Connect | Readout

- Connection of the logger to any PC via the USB port
- Automatic generation of a PDF report with all important measurement data

Evaluate | Archive

- Store, save or email the PDF report
- Further processing of the measurement data with the software Winlog.basic or Winlog.pro

Benefits

- Direct USB connection
- Automatic PDF report generation
- Programmable at www.ebi310.com, no special software for programming and readout required but available
- Indication of alarm status via flashing LED
- Data integrity
- Conforms with FDA 21 CFR Part 11 and ATP
- The data loggers help you to comply with GMP and VO (EG) 37/2005
- Free firmware updates at your place via software
- Excellent value-for-money

Digital interface

- Digital interface between loggers and external probes (at EBI 310 TE, EBI 310 TH and EBI 310 TX).
- Data logger functions as data collector with optional internal sensor
- Easy exchange of the external probes e.g. for calibration: remove and send probe, connect replacement probe, measure!
- No calibration of the data collector required, if internal probe is not used!

Which EBI 310 PDF data logger is the right one for your application?

Every EBI 310 PDF data logger has the afore mentioned properties. Depending on the application, claim and your purse, there are different requirements for which we have the right devices. The following overview shall help making the decision.

	EBI 310	EBI 310 TE	EBI 310 TX	EBI 310 TH

Simplification and support in qualifying the measurement system

Advantages

- Easy installation
- Simple programming of the data loggers, no prior knowledge necessary
- Extensive and customer specific generation of reports
- Suitable for all applications
- Safety through FDA 21 CFR Part 11 conformity

You can buy those to the particular software type additionally.

Xylem Analytics Germany Sales GmbH & Co. KG, ebro Peringerstr. 10·850551ngolstadt, Germany·Phone+49 84195478-0·Fax+49 84195478-80·Email:ebro@xyleminc.com·**www.ebro.com**

Design Qualification (DQ)

It is generally necessary to determine for which application a device or measurement instrument is being bought. The Design Qualification proves this exactly. At the same time it has to be noticed which departments have to be taken into account during the purchase.

Installation Qualification (IQ)

After deciding for a type of measurement device it has to be put into operation. Therefore, different examinations have to be done. Firstly, the Installation Qualification is necessary. During this phase it is being examined whether all parts which are important for the installation are there and suit the appropriate requirements. Afterwards steps relevant to the system during the installation will be documented. By using the IQ a safe installation is guaranteed. The system is now ready to use.

Operation Qualification (OQ)

Now the examination takes place to see if the ebro measurement system works how you want it to. During the Operation Qualification all relevant work or measurement steps are being examined and documented. The Operation Qualification tests all functions of the system carefully. After a successful Operation Qualification the system is ready to use.

Process Qualification (PQ)

The end of the system Qualification is the Process Qualification. During the Process Qualification all parameters for the specific measurement tasks are being set, examined and documented. For easy use and support during the Qualifying of the measurement system we offer IQ / OQ documents in the formats word and excel. You can order the respective IQ / OQ documents to the particular software types. (see following pages)

Available for:

. Xylem Analytics Germany Sales GmbH & Co. KG, ebro nd Peringerstr.10·850551ngolstadt,Germany·Phone+49 84195478-0·Fax+49 84195478-80·Email:ebro@xyleminc.com·**www.ebro.com**

Evaluation Software for Any Applications

Winlog.pro

For the programming and reading of ebro® data loggers and for the evaluation of the measured values, ebro[®] offers the professional software **Winlog.pro**.

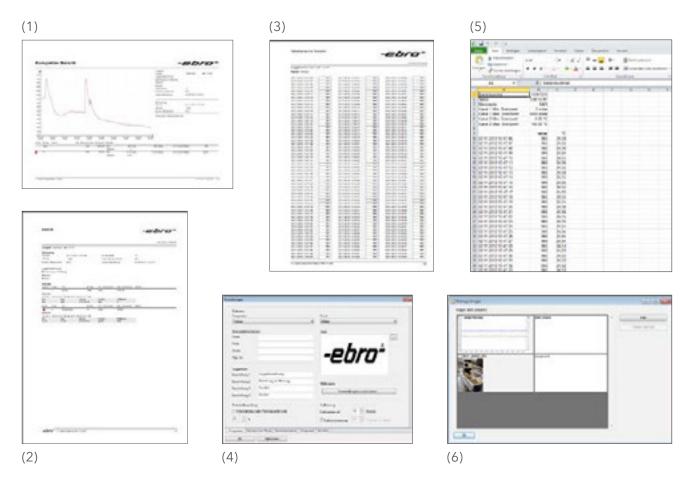

Benefits

- Easy installation
- Easy programming of the data loggers, no prior knowledge required
- Extensive and custom report generation
- Suitable for all applications
- Security by compliance with FDA 21 CFR Part 11

Extensive Report Generation

The software makes it easy to generate standard and custom reports:

- Compact, one-sided report (1)
- Multi-page, detailed report (2)
- Tabular report with the measurement values (3)
- Insertion of your own company logo possible (4)
- Export data to Microsoft Excel® and PDF (5)
- Integration of pictures and graphics possible (Winlog.pro only) (6)

Winlog.pro Professional software

- Enables real-time monitoring with wireless data loggers
- Formula editor for calculating the F0-value of the absolute humidity, the PE value etc.
- Display oft the timeline either absolute or relative
- Customized definition of individual areas possible (with their own statistics and calculations)
- Including calibration tool for data loggers
- Integration of pictures and graphics into reports possible
- IQ/OQ documentation to qualify the system is available

System Requirements

So that the software can run on your computer without any problems, your computer must meet the following requirements:

Hardware Requirements:

- At least 1 GHz processor speed
- At least 1 GB working memory
- At least 1 GB free hard disc space
- USB (Universal Serial Bus)

Evaluation Software for EBI 25 Data Loggers

Winlog.web

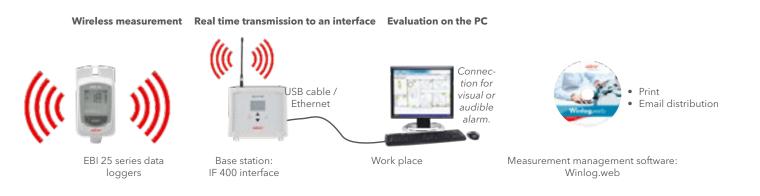

For programming and readout of EBI 25 data loggers as well as for evaluating the measurement values. The software automatically collects and evaluates data and alerts if necessary.

Functionality

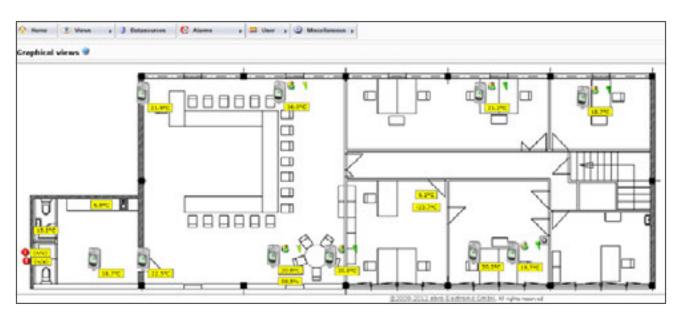

The innovative EBI 25 system monitors wirelessly, transmits the data in real time to an interface (base station) and from there to the desired server or PC.

As soon as a temperature, humidity or any other measurement has exceeded a user defined limit, an alarm is immediately sent via email.

Please find the EBI 25 Data Logger Family starting on page 64.

Quick graphical overview of all measurement points including an image or floor plan view:

Winlog.web Professional version internet A Solution of the second second

- Web based client/server solution: the measurement data can be evaluated on all PCs and smartphones via the internet or connected to the local network
- Very flexible and wide alarm management: alarm notifications upon user defined conditions, alarm notification via email; visual and audible alarm via the graphical user interface
- Connection of the interface IF 400 via USB and Ethernet
- FDA 21 CFR Part 11 data security functionality
- Management of larger data sets
- IQ / OQ documentation to qualify the system is available

TÜV certified evaluation Software for Pharmaceutical and Medical Applications

Winlog.med and Winlog.validation

The Winlog.med and Winlog.validation software versions are suitable for programming and readout of ebro data loggers as well as for evaluating the measurement values. The software guides you step by step through the validation or routine control process and evaluates the measurement automatically.

Flexible Report Generation

Whether you need a short process report or a table report with all measurement data - ebro's Winlog software makes it easy.

Xylem Analytics Germany Sales GmbH & Co. KG, ebro

Winlog.med

For routine controls

- TÜV certified
- User-friendly
- High precision measurements
- Automatic report generation
- Automatic user-defined calculations
- Automatic identification of process cycles
- Creation of user-defined masters for spezific devices and thermal processes
- Three-dimensional demonstration of sensor placement or placement of the sensors directly on an application image possible
- FDA 21 CFR Part 11

Winlog.validation For routine control and validation

Powerful report and evaluation software fitting the requirements of validation and qualification in Pharmaceutics and Medicine.

- TÜV certified
- User-friendly
- Central user administration in local area network possible
- Automatic report generation
- Automatic user-defined calculations
- Automatic identification of process cycles
- Creation of user-defined masters for specific devices and thermal processes
- Three-dimensional demonstration of sensor placement or placement of the sensors directly on an application image possible
- FDA 21 CFR Part 11
- Incl. IQ- / OQ-Documentation for software Qualification
- Automatic evaluation of validation processes

Calibration

Precision measurement and testing equipment such as thermometers and data loggers should be checked and calibrated regularly.

Factory Calibration

Most ebro[®] measuring equipment is supplied with a factory calibration certificate. The functionality and the tolerances indicated in the technical specifications are thus ensured. Factory calibration is completed with traceable factory etalons according to DIN EN ISO / IEC 17025.

- The calibration is carried out at metrological monitored equipment.
- All factory certificates issued by trained personnel.
- The factory calibration certificate confirms the suitability of the device for official calibration.

Xylem Analytics Germany Sales GmbH & Co. KG, ebro Peringerstr.10·85055Ingolstadt,Germany·Phone+49 84195478-0·Fax+49 84195478-80·Email:ebro@xyleminc.com·**www.ebro.com**

Calibration according to ISO 9000

Modern quality assurance systems like ISO 9000, QS 9000, GxP and FDA require testing and measuring equipment checks, which also include a regular calibration of these devices. ebro[®] ISO calibration is an economical, fast and precise option for the fulfillment of these requirements.

- The calibration is carried out by specialized professionally trained calibration technicians.
- The results are documented in detail, including traceability information of the reference devices, in an ISO certificate.
- Manufacturer-independent calibration, devices from other manufacturers can be calibrated by prior arrangement.
- Calibration also includes device adjustment, if necessary (only for ebro® devices).

We recommend the recalibration for thermometers and pressure meters once per year and for humidity meters every 6 months.

The price for the calibration according to ISO 9000 includes certificate and **2 specified standard calibration points**. Freely selectable calibration points between -90 °C and +400 °C (-130 °F ... +752 °F) are available for a small fee.

The calibration of temperature / humidity loggers includes 2 to 3 humidity calibration points in the price. In addition, a temperature calibration in the range of -40 °C ... +75 °C (-40 °F ... 167 °F) can be completed. As found and as left calibrations can be done on demand.

realitive humidity in climatic chamber	32,8 %rH, 52,9 %rH, 75,4 %rF at 25 °C

Accredited calibration according to DAkkS guidelines

Accredited calibration according to DAkkS guidelines is often needed for working standard measuring equipment, measuring equipment used by certified experts and for certain measurement procedures in medicine and pharmaceuticals – in other words, everywhere where an especially high degree of safety is required. This calibration is done by special accredited laboratories that are monitored by the Deutsche Akkreditierungsstelle (DAkkS).

- Internationally recognized and comparable measurement results.
- The calibration is carried out by specialized, professionally trained calibration technicians whose competence has been confirmed by the DAkkS.
- Traceable calibration in accordance with DIN EN ISO 9001 and DIN EN ISO/IEC 17025.
- Determination and documentation of the measurement uncertainty for each calibration point of a calibration item.

We recommend the recalibration for thermometers and pressure meters once per year and for humidity meters every 6 months.

The price for accredited calibration according to DAkkS specifications including a calibration certificate includes a number of freely selectable temperature points and, in the case of a calibration of the relative humidity, **3 freely selectable calibration points**. We offer calibrations in the temperature range from -90 ° C ... +300 ° C, in the range of relative humidity from 10% ... 95% and an absolute pressure from 0 bar ... 25 bar.

With a pressure calibration, the device is calibrated at 9 points. The calibration points cover the entire measuring range. Calibration takes place at room temperature, is between +20 °C and +25 °C. We are happy to calibrate your device at more than 5 temperature points.

Conditions of Delivery and Payment

January 2018. Changes reserved. Please find the latest version on our website: www.ebro.com/en/agb

1. APPLICATION

Except as otherwise expressly agreed in writing, these conditions ("General Conditions") shall exclusively apply to all deliveries and services of XYLEM Analytics Germany Sales GmbH & Co. KG (in the following: Contract). Deviating conditions of the Purchaser shall not apply.

2. MINIMUM NET ORDER VALUE, VALIDITY OF QUOTATIONS, CUS-TOM MADE PRODUCTS, EXCESS DELIVERIES AND CANCELLATION OF ORDERS, TRANSFER OF RISK

2.1The minimum net order value amounts to EUR 100. For orders below this amount Supplier reserves the right to charge handling costs of EUR 20.

2.2 Quotations are valid for thirty (30) calendar days from the date of issuance unless otherwise agreed in writing by Supplier, subject to prior sale. Supplier reserves the right to cancel or withdraw the quotation at any time with or without notice or cause prior to acceptance by the Purchaser. Supplier nevertheless reserves its right to accept any contractual documents received from the Purchaser after this 30-day period.

2.3The price for custom made products shall be separately agreed between the Parties.

2.4 Supplier shall have the right to deliver an excess quantity of up to 10% that has to be paid by Purchaser.

2.5If the Purchaser fully or partly cancels an order for non-custom made products without justification Supplier shall be entitled, notwithstanding the right to assert a higher damage that has actually been incurred due to the cancellation, to demand 10% of the sales price for the cancelled order volume as compensation for the processing and minimum loss of profits unless Purchaser establishes proof of a lower damage. The cancellation or amendment of an order for custom made products shall not be possible.

3. PRODUCT INFORMATION

All information and data contained in general product documentation and price lists, whether in electronic or any other form, are binding only to the extent that they are by reference expressly included in the Contract.

4. DRAWINGS AND DESCRIPTIONS

4.1All drawings and technical documents relating to the Product or its manufacture submitted by one party to the other, prior or subsequent to the formation of the Contract, shall remain the property of the submitting party.

4.2 Drawings, technical documents or other technical information received by one party shall not, without the consent of the other party, be used for any other purpose than that for which they were provided. They may not, without the consent of the submitting party, otherwise be used or copied, reproduced, transmitted or communicated to a third party.

4.3 Supplier shall, not later than at the date of delivery of Products, provide free of charge information and drawings which are necessary to permit the Purchaser to erect, commission, operate and maintain the Product. Such information and drawings shall be supplied in the number of copies agreed upon or at least one copy of each. Supplier shall not be obliged to provide manufacturing drawings for the Product or for spare parts.

5. INSPECTIONS AND TESTS

5.1 Inspections

5.1.1 If expressly agreed in the Contract, the Purchaser shall be entitled to have the quality of the materials used and the parts of the Product, both during manufacture and when completed, inspected and checked by its authorised representatives. Such inspection and checking shall be carried out at the place of manufacture during normal working hours after agreement with Supplier as to date and time, and at the Purchaser's expense.

5.2 Tests

5.2.1 Acceptance tests provided for in the Contract shall, unless otherwise agreed, be carried out at the place of manufacture during normal working hours.

5.2.2 If the Contract does not specify the technical requirements, the tests shall be carried out in accordance with the Supplier's standard practice.

5.2.3 If the Purchaser in due time has requested in writing, Supplier shall notify the Purchaser in writing of the acceptance tests in sufficient time to permit the Purchaser to be represented at the tests. If the Purchaser is not represented, the test report shall be sent to the Purchaser and shall be accepted as accurate. With regard to standard products (as defined by Supplier from time to time) only a "production card" will be delivered with the Product stating that the Product has passed the

test procedure and thereby is approved. If requested by the Purchaser in writing and prior to the performance of the test, a test report will be sent to the Purchaser at an additional cost reasonably determined by Supplier.

5.2.4 If the acceptance tests show the Product not to be in accordance with the Contract, Supplier shall without delay remedy any deficiencies in order to ensure that the Product complies with the Contract. New tests shall then be carried out at the Purchaser's request, unless the deficiency in Supplier's sole opinion was insignificant.

5.2.5 Supplier shall bear all costs for acceptance tests carried out at the place of manufacture. The Purchaser shall however bear all costs and expenses for its representatives in connection with such tests. The Purchaser shall bear all costs for any optional tests requested by the Purchaser.

6. DELIVERY, PASSING OF RISK

6.1Any agreed trade term shall be construed in accordance with INCOTERMS 2010. If no trade term is specifically agreed, the delivery ("**Delivery**") shall be DAP, Purchaser's address as set out in the Purchaser's purchase order accepted by Supplier. However, Supplier's costs for DAP delivery shall be paid by Purchaser as set out in Clause 9.6 below.

6.2 Partial shipments shall be permitted unless otherwise agreed.

7. TIME FOR DELIVERY

7.1 Time for Delivery

If the Parties, instead of specifying the date for Delivery, have specified a period of time on the expiry of which Delivery shall take place, such period shall start to run as soon as the Contract is entered into, all official formalities have been completed, payments due at the formation of the Contract have been made, any agreed securities have been given and any other preconditions have been fulfilled.

7.2 Delay on part of Supplier

7.2.1 Any time periods specified by Supplier in the Contract for Delivery are to be treated as estimates whilst the Supplier shall make reasonable efforts to deliver on time. If Supplier anticipates that it will not be able to deliver the Product at the time for Delivery ("**Delay**"), Supplier shall inform the Purchaser thereof and, if possible, the time when Delivery can be expected.

7.2.2 If Delay is caused by any of the circumstances mentioned in Clause 14 or by an act or omission on the part of the Purchaser, including suspension under Clauses 9.4 or 14, the time for Delivery shall be extended by a period which is reasonable having regard to all the circumstances in the case. This provision applies regardless of whether the reason for the Delay occurs before or after the agreed time for Delivery.

7.2.3 In case of Delay, the Purchaser may in writing demand delivery within a final reasonable period which shall not be less than ninety (90) days from the Supplier's receipt of such demand. If Supplier does not deliver within such final period and this is not due to any circumstance for which the Purchaser is responsible or a Delay covered by Clauses 7.3 or 14, then the Purchaser may by notice in writing to Supplier terminate the Contract in respect of such part of the Product that cannot, in consequence of Supplier's failure to deliver, be used as intended by the Parties. **THE PURCHASER SHALL IN NO EVENT BE ENTITLED TO ANY LIQUIDATED DAMAGES IN THE CASE OF DELAY.**

7.2.4 If the Purchaser terminates the Contract due to Delay, it shall be entitled to compensation for the loss it has suffered as a result of Supplier's Delay. The total compensation shall not exceed, except in cases of intent or gross negligence, 10 percent of that part of the purchase price which is attributable to the part of the Product in respect of which the Contract is terminated.

7.3 Delay on part of the Purchaser

7.3.1 If the Purchaser anticipates that it will be unable to accept Delivery of the Product at the Delivery time, it shall forthwith notify Supplier in writing thereof, stating the reason and, if possible, the time when it will be able to accept Delivery.

7.3.2 If the Purchaser for any reason fails to accept Delivery at the Delivery time, it shall nevertheless pay any part of the purchase price which becomes due on Delivery, as if Delivery had taken place. Supplier shall arrange for storage of the Product at the risk and expense of the Purchaser. Any other direct and/or financial costs incurred as a result of such failure to accept Delivery shall be borne by the Purchaser. Supplier shall, if the Purchaser so requires in writing, insure the Product on behalf of the Purchaser and at the Purchaser's expense.

7.3.3 Unless the Purchaser's failure to accept Delivery is due to any such circumstance as mentioned in Clause 14, Supplier may by notice in writing require the Purchaser to accept Delivery within a final reasonable period.

7.3.4 If, for any reason for which Supplier is not responsible, the Purchaser fails to accept Delivery within such period, Supplier may by notice in writing terminate the Contract in whole or in part. Supplier shall then be entitled to compensation for the loss it has suffered by reason of the Purchaser's default. The compensation shall not exceed that part of the purchase price which is attributable to that part of the Product in respect of which the Contract is terminated.

8. ALTERATIONS AND CANCELLATION

8.1If the Purchaser requests an alteration of the Contract, and Supplier accepts such alteration (which acceptance shall not be unreasonably withheld), the alteration will be deemed as a new Contract entitling Supplier to a restart of the Delivery time which will start to run on the date of the approval in writing by Supplier of the alteration.

8.2All additional costs incurred as a result of the alteration will be charged to the Purchaser, in addition to the purchase price.

8.3 If the Purchaser cancels the Contract in whole or in part without cause, the Purchaser shall, unless otherwise agreed in writing, reimburse Supplier for (i) all costs and expenses incurred by Supplier under the Contract up until and including the date of cancellation, and (ii) any additional costs and expenses incurred as a result of the cancellation.

9. PRICES AND PAYMENT

9.1 The purchase price shall be the price for such Products set out in Supplier's price list as of the date for Delivery if not specifically set forth in the Contract. For domestic sales, payments shall be made within 30 days of the date of the invoice in the currency stipulated in the Contract, unless otherwise agreed in writing. For export sales, full payment in advance by telegraphic transfer is required in the currency stipulated in the Contract, unless otherwise agreed in writing.

9.2 Whatever the means of payment used, payment shall not be deemed to have been effected until Supplier's account has been fully and irrevocably credited.

9.3 If the Purchaser fails to pay by the stipulated date, Supplier shall be entitled to interest from the day on which payment was due. The statutory law interest rates shall apply.

9.4 In case of late payment, Supplier may suspend its performance of the Contract until payment is received.

9.5 Notwithstanding other rights to terminate the Contract under other clauses in these General Conditions, the Supplier shall, if the Purchaser has not paid the amount due within three (3) months, be entitled to terminate the Contract by notice in writing to the Purchaser and to claim compensation for the loss it has incurred.

9.6 Unless otherwise agreed to in writing, all prices are FCA Supplier's plant, and do not, even if Delivery is DAP in accordance with Clause 6.1 above, include transportation costs or charges relating to transportation. This means that in addition to the Product price, Purchaser shall compensate Supplier for all its transportation costs and charges, as set out in invoice from Supplier to Purchaser, despite that DAP delivery applies and such costs and charges shall thus be solely the responsibility of the Purchaser. Prices exclude special packing unless otherwise agreed to by Supplier in writing. All costs and charges are subject to change without notice.

9.7 The price for the Products does not include any applicable sales, use, excise, GST, VAT, or similar tax. The Purchaser shall have the responsibility for the payment of such taxes if applicable.

9.8 If, during the performance of the Contract, the financial condition of the Purchaser is such that Supplier in good faith and in application of usual banking standards deems a payment in time insecure, or if a material change in the ownership of the Purchaser occurs, or if the Purchaser fails to make any payments in accordance with the terms of its Contract with Supplier, then, in any such event, Supplier is not obligated to continue performance under the Contract and may stop goods in transit and defer or decline to make delivery of goods, except upon receipt of satisfactory security or cash payments in advance.

9.9If the Purchaser fails to make payments or fails to furnish security satisfactory to Supplier, then Supplier shall have the right to enforce payment to the full Contract price of the work completed and in process.

9.10 Upon default by the Purchaser in payment when due, the Purchaser shall immediately pay to Supplier the entire unpaid amounts for any and all shipments made to the Purchaser irrespective of the terms of said shipment and whether said shipments are made pursuant to this Contract or any other contract of sale between Supplier or any of its affiliates and the Purchaser, and Supplier may withhold all subsequent shipments until the full amount is settled. Acceptance by Supplier of less than full payment shall not be a waiver of any of its rights hereunder.

10. WARRANTY, PURCHASER'S DUTIES IN WARRANTY CASES, REIM-BURSEMENT OF EXPENSES, LIABILITY

10.1 Purchaser's warranty claims depend on his proper compliance with his statutory duties of examination and notification. Notifications have to include specific information on the alleged defect and shall be in writing. Notifications based on incomplete delivery or other obvious defects shall be notified to Supplier in writing without delay, but at the latest within 10 working days of the delivery arriving at its destination. Claims of Purchaser on account of a defectiveness or incompleteness are excluded if Purchaser fails to comply with this obligation.

10.2 In the case of product defects Supplier can elect to remove the defects or to provide a defectfree replacement. Only if this repeatedly fails or is unreasonable and the defect is not only insubstantial Purchaser is entitled to rescission or reduction of the purchase price in accordance with the statutory provisions. Sec. 445a BGB remains unaffected. Purchaser is entitled to claims for damages in accordance with Clause 10.5.

10.3 Concerning any replacement of products or removal of defects a warranty period of 3 months since delivery respectively the execution of service applies which runs, however, at least until the expiry of the warranty period of the original service (see Clause 10.7).

10.4 Purchaser has to inform Supplier immediately about each indication of product defects by his clients concerning Supplier's services. Should Purchaser not fulfil this obligation his claims for product defects against Supplier shall expire. Moreover, Purchaser has to safeguard proofs in adequate manner and to give Supplier the opportunity of examination at his request.

10.5 Supplier is liable without restriction under the Product Liability Act, in the event of an express assumption of a warranty or of a procurement risk or in the event of willful or grossly negligent violations of a duty. Supplier is also liable without restriction in the event of willful or negligent injury to life, physical well-being or health. In the event of Supplier's negligence (other than gross negligence) resulting in property or pecuniary damage, Supplier shall only be liable for a breach of essential contractual duties the fulfillment of which is inevitable for the proper performance of the contract and Purchaser can particularly rely on, however, limited to characteristic damages that were foreseeable at the time of signature.

10.6 No warranty is given for damages of all kind caused by improper treatment, change, installation and/or operation of the delivered product or by incorrect advice or instruction by Purchaser unless Supplier has caused those damages at least negligently.

10.7 Defect claims shall become time-barred after 12 months as of the statutory commencement of the limitation period. The same applies to legal defects. In the event of wilful or grossly negligent breaches of a duty, claims arising from tortious acts, the absence of a warranted quality, the assumption of procurement risks or personal injury, the statutory time periods apply. Secs. 438 para. 3, 445b and 634a para. 3 BGB remain unaffected.

10.8 A further-reaching liability for damages than that provided in the paragraphs of this Clause 10. is excluded - without regard to the legal nature of the asserted claim.

10.9 The aforementioned restrictions of liability also apply, in terms of the reason and amount, in favour of Supplier's statutory representatives, employees and other vicarious agents.

11. ALLOCATION OF LIABILITY FOR DAMAGE CAUSED BY THE PROD-UCT

11.1 Supplier shall not be liable for any damage to property or the environment caused by the Product after it has been delivered to the Purchaser. Nor shall Supplier be liable for any damage to products manufactured by the Purchaser, or to products of which the Purchaser's products form a part.

11.2 The Purchaser shall indemnify, defend and hold Supplier harmless to the extent that the Supplier incurs liability towards any third party in respect of loss or damage for which the Supplier is not liable according to the preceding paragraph.

11.3 If a claim for damages as described in this Clause 12 is lodged by a third party against one of the Parties, the latter party shall forthwith inform the other party thereof in writing.

11.4 Supplier and Purchaser shall be mutually obliged to let themselves be summoned to the court or arbitral tribunal examining claims for damages lodged against one of them on the basis of damage allegedly caused by the Product.

12. CONFIDENTIALITY

The Parties agree that any information received from the other party in connection with the Contract that evidently or by its nature should reasonably be understood to be confidential, shall not be disclosed by the recipient to any third party without the prior written approval of the disclosing party, except to the extent (i) this is necessary for the receiving party to exercise rights and perform duties pursuant to the Contract, (ii) the information is available to the general public or later becomes publicly available other than through a breach of the Contract, (iii) the information is actually known to the receiving party on the date that such information is disclosed as evidenced

Peringerstr. 10·850551ngolstadt, Germany Phone + 49 84195478-0·Fax + 49 84195478-80·Email: ebro@xyleminc.com www.ebro.com

by written records in existence prior to the date of the receipt, (iv) the information is subsequently lawfully obtained by the receiving party from a third party or third parties, or (v) the information is independently developed by the receiving party prior to the disclosure.

13. FORCE MAJEURE

13.1 Either party shall be entitled to suspend performance of its obligations under the Contract to the extent that such performance is impeded or made unreasonably onerous by any of the following circumstances: industrial disputes and any other circumstance beyond the control of the parties such as pandemic, fire, earthquake, natural disaster, acts of God, war, extensive military mobilization, insurrection, requisition, seizure, embargo, acts of governments, strikes, lockouts, restrictions in the use of power and defects or delays in deliveries by sub-contractors ("Force Majeure").

13.2 The party claiming to be affected by Force Majeure shall notify the other party in writing without delay on the intervention and on the cessation of such circumstance.

13.3 If Force Majeure prevents the Purchaser from fulfilling its obligations, it shall compensate Supplier for expenses incurred in securing and protecting the Product.

13.4 Regardless of what might otherwise follow from these General Conditions, either party shall be entitled to terminate the Contract by notice in writing to the other party if performance of the Contract is suspended under this Clause 14 for more than six (6) months.

13.5 If the Purchaser terminates the Contract due to Force Majeure, the Purchaser shall, unless otherwise agreed in writing, reimburse Supplier for (i) all costs and expenses incurred by Supplier under the Contract up until and including the date of the termination and (ii) any additional costs and expenses incurred as a result of the termination.

14. ASSIGNMENT

The Purchaser shall not assign or transfer this Contract or any interest in it, or monies payable under it, without the prior written consent of Supplier and any assignment made without such consent shall be null and void. Supplier may assign its rights and/or delegate its duties in whole or in part to any affiliated company. Supplier shall notify Purchaser of any such assignment or delegation.

15. INVALIDITY

If any provision of this Contract is held to be illegal, invalid, or unenforceable by any court of competent jurisdiction, such provision will be of no force and effect, but the illegality, invalidity, or unenforceability will have no effect upon and will not impair the enforceability of any other provision of this Contract. The illegal, invalid or unenforceable provision shall be deemed to be substituted by a suitable provision which, to the extent legally permissible, comes as close as possible to the intent and purpose of the illegal, invalid or unenforceable provision. The same shall apply if the parties have unintentionally failed to address a certain matter in this Contract.

16. EXPORT REGULATIONS

The Purchaser has to comply with all legal provisions and administrative requirements as well as all other applicable laws, and in particular export regulations and the laws of the country in which the Purchaser operates. The Purchaser has to obtain all necessary approvals and licenses as well as all necessary permissions in good time, which are, according to all these applicable laws, required for the use or the export of the delivery item.

The Supplier is entitled to withhold his goods and services vis-à-vis the Purchaser if the Purchaser would violate those applicable laws or if not all necessary permissions are available and if this is not based on the Supplier's fault or responsibility.

The performance of the contract on the part of the Supplier is on condition that there are no opposing impediments due to national or international foreign trade legislation as well as embargos (and/or other sanctions).

The US Export Administration Regulations (EAR) are equally to be respected. Rights and duties of the Purchaser according to this clause endure after the expiration and premature termination of this Contract.

17. PLACE OF PERFORMANCE

Place of performance shall be the Supplier's place of business.

18. DISPUTES AND APPLICABLE LAW

18.1 All disputes arising out of or in connection with the Contract shall be finally settled by the competent courts of Weilheim, Germany, yet it is in the discretion of the Supplier to initiate court proceedings also at the Purchaser's place of business or, in disputes regarding bills of exchange, at the place of payment of the bills of exchange.

18.2 The Contract shall be governed by the substantive law of Germany, excluding the application of the Convention on International Sales of Goods (CISG).

Endoscope-Dummy for operation and process qualification

With the patented endoscope dummy developed by spypach[®] and the ebro[®] data loggers, the cleaning and disinfection performance of the washer-disinfector is tested independently of the WD manufacturer.

The endoscope dummy is simply inserted into the WD-E instead of an endoscope with the associated data logger. The innovative solution enables simple and fast routine checks, simplifies validation and thus ensures maximum patient safety and a minimum of testing costs.

Independent test system for endoscope, cleaning and disinfection devices

- Reproducible performance check of washer-disinfectors for flexible endoscopes
- Excellent validation support
- tested according to standard EN ISO15883
- easy routine checks

The thermal test of the endoscope reprocessing is possible with the independent spypach® test system and the EBI 11 data loggers.

The suitable data loggers from the EBI 11 series can be found from page 33.

Туре	Description	Part No.
spypach® Dummy Basic	Endoscope dummy "spo-pro" BASIC for routine control, without data logger	1340-6086
spypach® Dummy Classic	Endoscope dummy "spo-pro" CLASSIC for routine control and validation, without data logger	1340-6087
spypach® Dummy Professional	Endoscope dummy "spo-pro" PROFESSIONAL for routine control and validation with extensive accessories for single channel control, without data logger, with carrying case.	1340-6088

Our Services for You

At ebro[®] service is more than just a word - ebro[®] offers solutions according to customer wishes.

For us, Service means more than the usual software hotline, calibration service, repairs, etc. We are dedicated to understanding the needs of our customers and offering them the best possible solutions.

It makes no difference if you need to have a handheld instrument repaired or a thermometer calibrated - we are glad to be of service. Just call!

Repairs & Calibration

Xylem |ˈzīləm|

The tissue in plants that brings water upward from the roots;
 a leading global water technology company.

We're a global team unified in a common purpose: creating advanced technology solutions to the world's water challenges. Developing new technologies that will improve the way water is used, conserved, and re-used in the future is central to our work. Our products and services move, treat, analyze, monitor and return water to the environment, in public utility, industrial, residential and commercial building services settings. Xylem also provides a leading portfolio of smart metering, network technologies and advanced analytics solutions for water, electric and gas utilities. In more than 150 countries, we have strong, long-standing relationships with customers who know us for our powerful combination of leading product brands and applications expertise with a strong focus on developing comprehensive, sustainable solutions.
